SUMMARY

Flutter & Mobile Engineer with merged code in the **Flutter SDK** and **Flutter DevTools**, and 12 merged pull requests across Pigeon, path_provider, the React Native docs, Supabase, and Sentry. 4+ years as the primary developer of 16+ production systems serving 20,000+ users at KDS Group, from mobile and web to AI, IoT firmware, and infrastructure, plus a remote US health-tech contract. Stack: Flutter, React Native, .NET 10, TypeScript, Go.

EXPERIENCE

Software Developer | KDS Group

Jun 2022 – Present

Primary developer of a garment manufacturer's internal software: 16+ production systems serving 20,000+ users across mobile, web, APIs, IoT firmware, and infrastructure (~590K lines, 60 repos, 3,800+ commits).

- **KDS Portal:** Improved HR processing speed by **40%** with a Flutter HRM app for 20,000+ employees on Android, iOS, and a purpose-built desktop web UI, covering attendance, leave, payroll, and loans over a .NET 10 API that bridges the legacy ERP, with biometric re-authentication guarding salary data.
- **Project Argus:** Built RFID verification of sealed export cartons for international retail orders on 40 Zebra handhelds: an offline-first Flutter app, revision-based sync conflict resolution, and a server that independently re-derives every verdict, backed by 43 test files.
- **KDS Zakat:** Cut fraudulent distributions by **99.99%** across 20,000+ employees with an offline-first NFC-card distribution system in Flutter, with background sync and duplicate-read detection.
- **KDS QMS:** Replaced paper-based quality tracking with React Native tablets streaming live to floor displays, cutting inspection delays by **80%**; rebuilt the dashboard in Svelte 5 for 1–2 GB hardware.
- **KDS TLS:** Built an andon quality system end to end: SQL schema, .NET 10 API, SignalR/Redis hub, React Native auditor app, and ESP8266 firmware lighting a red/amber/green signal on each sewing machine.
- **AI Platform:** Built KDS Lens, an OpenAI-compatible AI gateway with schema-constrained JSON extraction (replacing an OCR pipeline), per-project keys, model failover, and request replay; and Kai, a Gemini + MCP assistant with 28 tools that answers questions across three factory systems in natural language.
- **DevOps:** Migrated production from Windows to dual Ubuntu servers, reducing downtime by 50%; authored 40 GitLab CI/CD pipelines and run 17 self-hosted services (Prometheus, Grafana, OpenTelemetry).
- **Also shipped:** KDS TPM (Flutter maintenance workflow), Signal360 (operator skill matrix, .NET 10 + Angular), a multi-tenant file storage platform, and shared Mailing and Push Notification microservices.

Flutter Developer (Contract, Remote) | Certorus

Dec 2025 – Mar 2026

- Worked inside the product team (Jira sprints, company account) on U-Thrive, a behavioral-health platform: Flutter app, Node.js + MongoDB API on AWS, and React dashboard, with 110+ commits and 14 merged PRs.
- Hardened security: moved Stream Chat token signing server-side, added a Dio auth interceptor with global 401 handling, restricted SSL bypass to debug builds, and stripped token and PII logging from about 15 files.
- Shipped appointment reasons, insurance providers, batch survey submission, FCM push, video-call fixes, and crisis-support entry points for the 988 Lifeline and Massachusetts Behavioral Health Help Line.

Front-end Engineer | Trigan

Feb 2022 – Jun 2022

- Developed the Next.js-based main website for Trigan.org, focusing on responsiveness and SEO optimization.

Software Engineer Intern | ZorgIT Group

Dec 2021 – Feb 2022

- Developed a modern portfolio website for Arcon Interior to boost brand reach and client engagement.

EDUCATION

Premier University, Chattogram | B.Sc. in Computer Science & Engineering

Fall 2016 – Jun 2021

- GPA: 3.21
- Final Project: P2P loan platform built with Laravel (backend) and Next.js (frontend) for secure, direct lending.

- GPA: 3.74

OPEN SOURCE

Twelve merged pull requests to major open-source projects, reviewed and shipped by their maintainers:

- **Flutter Framework** (flutter/flutter): Four merged PRs, including flutter run printing the exact -d flag after device selection (closing an issue open since 2020), an AbsorbPointer vs IgnorePointer API sample (closing a 2021 issue), and template fixes shipped in Flutter 3.47. [PR #188941](#) · [PR #188940](#) · [PR #187443](#) · [PR #188382](#)
- **Flutter DevTools** (flutter/devtools): Fixed a RenderFlex overflow in the debugging controls at narrow widths, closing an issue open since 2022, with six regression tests. [PR #9949](#)
- **Flutter Packages** (flutter/packages): Three merged PRs to Pigeon and path_provider, adding a clear parser error for unsupported enhanced enums, event-channel lifetime docs in generated Dart, and clarified getDownloadsDirectory semantics (shipped in 2.1.6). [PR #11880](#) · [PR #11894](#) · [PR #11793](#)
- **React Native Docs** (react/react-native-website): Removed an outdated TextInput multiline border caveat, corrected across all localized copies of the page. [PR #5200](#)
- **Supabase Flutter SDK** (supabase/supabase-flutter): Fixed a realtime channel-rejoin crash from an expired cached JWT after long backgrounding; shipped in realtime_client 2.7.4. [PR #1365](#)
- **Sentry Dart/Flutter SDK** (getsentry/sentry-dart, 1M+ downloads): Two production fixes shipped in v9.21.0, for silent error-swallowing in runZonedGuarded and broken Web diagnostic logging. [PR #3697](#) · [PR #3698](#)

PROJECTS

- **Snake Classic** (Flutter): Modern take on the classic Snake game with smooth animations, leaderboards, and power-ups. **10,000+ downloads**, 5,300+ active installs. [GitHub](#) · [Play Store](#) · [App Store](#)
- **FreeWay** (.NET 10 + Next.js): OpenAI-compatible gateway across 8 AI providers that runs heavy AI usage at zero cost: benchmark-ranked free-tier routing, daily adoption of new free models, and premium requests served from a Claude Code subscription under an hourly token budget, paid models only as fallback. [GitHub](#)
- **AI Persona** (Flutter + Gemini + Firebase): LLM-powered character chat app with customizable personas, voice, and knowledge bases. [Play Store](#)
- **Cosmo Strike** (Flutter + Flame + ASP.NET Core 10): Retro side-scrolling shmup with a 12-level choreographed campaign, multi-phase bosses, and a live-service layer on an offline-first sync engine. [GitHub](#) · [Play Store](#)
- **Atlas** (Flutter + ASP.NET Core + AI): Gamified habit tracker with a living world map, an AI companion writing weekly reflections, and real-time SignalR sync. [GitHub](#) · [Play Store](#)
- **PinPoint** (Flutter + ASP.NET Core): Privacy-first note-taking app with end-to-end encryption and multiple note types. 1,000+ downloads. [GitHub](#) · [Play Store](#) · [App Store](#)
- **The Accountant** (Flutter + ASP.NET Core): Privacy-focused personal finance app with multi-account tracking and budgets. [GitHub](#) · [Play Store](#) · [App Store](#)
- **Odyssey** (Flutter + ASP.NET Core): Offline-first travel journal with geotagged memories, multi-currency budgets, trip templates, and collaborative sharing. [GitHub](#) · [Play Store](#) · [App Store](#)

SKILLS

Languages: Dart, TypeScript, JavaScript, C#, Go, Rust, Python, SQL, C++ (Arduino)

Frameworks: Flutter, React Native, ASP.NET Core (.NET 10), Angular, Next.js, Svelte, NestJS, FastAPI

Data & DevOps: SQL Server, PostgreSQL, MongoDB, Redis, Firebase, Docker, GitLab CI/CD, OpenTelemetry, AWS

AI & Hardware: OpenAI, Gemini, Claude, MCP, PyTorch (SAM 2), NFC, RFID (Zebra), ESP8266, Raspberry Pi

HIGHLIGHTS

- Available for remote work globally: UTC+6, flexible on overlap hours, with remote team experience.
- Shipped products: 25+ production apps and systems, 16+ in-house at KDS Group plus 9 public apps on Google Play (5 also on the App Store) with 11,000+ downloads.
- Open-source contributor: 12 merged PRs in six major projects; author of [Tiny State](#) on pub.dev.
- Technical writer: 125,000+ views and 5,700+ followers across 65 posts on [Dev.to](#); top post has 500+ reactions.
