SUMMARY

Flutter & AI Engineer with merged code in the **Flutter SDK** and **Flutter DevTools**, and 17 merged pull requests across 7 repos, including Flutter Packages, Dart test, Supabase, and Sentry. 4+ years as the primary developer of 16+ production systems serving 20,000+ users at KDS Group, including 6 AI systems, plus a remote US health-tech contract and 11 public apps. Stack: Flutter, .NET 10, TypeScript, LLMs (OpenAI, Gemini, Claude), MCP.

EXPERIENCE

Software Developer | *KDS Group* Jun 2022 – Present

Primary developer of a garment manufacturer's internal software: 16+ production systems serving 20,000+ users across mobile, web, APIs, IoT firmware, and infrastructure (~700K lines, 63 repos, 4,000+ commits).

- **KDS Portal:** Improved HR processing speed by **40%** with a Flutter HRM app for 20,000+ employees on Android, iOS, and a purpose-built desktop web UI, covering attendance, leave, payroll, and loans over a .NET 10 API that bridges the legacy ERP, with biometric re-authentication guarding salary data.
- **Project Argus:** Built RFID verification of sealed export cartons for international retail orders on 40 Zebra handhelds: an offline-first Flutter app, revision-based sync conflict resolution, and a server that independently re-derives every verdict, backed by 43 test files.
- **KDS Zakat:** Cut fraudulent distributions by **99.99%** across 20,000+ employees with an offline-first NFC-card distribution system in Flutter, with background sync and duplicate-read detection.
- **KDS QMS:** Replaced paper-based quality tracking with tablets streaming live to floor displays, cutting inspection delays by **80%**; rebuilt the tablets in Flutter (from React Native) and the wall dashboard in Svelte 5.
- **KDS TLS:** Built an andon quality system end to end: SQL schema, .NET 10 API, SignalR/Redis hub, Flutter auditor app (rebuilt from React Native), and ESP8266 firmware lighting red/amber/green signals on each machine.
- **AI Platform (6 AI systems):** Built KDS Lens, a self-hosted AI gateway over 5 open-weight LLMs with schema-constrained JSON extraction and failover; Kai, a Gemini + MCP AI agent with 28 tools across 3 factory systems; KDS Line Watch, an AI-written daily report joining QMS, TLS, and TPM data; plus Signal360's AI advisor (Gemma 4), Review IQ (DistilBERT sentiment), and SpecSheet (Meta SAM 2).
- **DevOps:** Migrated production from Windows to dual Ubuntu servers, reducing downtime by 50%; authored 40 GitLab CI/CD pipelines and run 17 self-hosted services (Prometheus, Grafana, OpenTelemetry).
- **Also shipped:** KDS TPM (Flutter maintenance workflow), managed tablet sign-in and in-app updates across 4 floor apps, and a multi-tenant file storage platform shared by 3+ KDS systems.

AI Training Contractor (Remote) | *Mercor* Oct 2026 – Nov 2026

Flutter Developer (Contract, Remote) | *Certorus* Dec 2025 – Mar 2026

- Built features on U-Thrive, a US behavioral-health platform (Flutter, Node.js + MongoDB on AWS, React): 110+ commits and 14 merged PRs, including appointment booking, insurance, FCM push, and 988 crisis support.
- Hardened security: server-side Stream Chat token signing, a Dio auth interceptor with global 401 handling, and token and PII logging stripped from 15 files.

Front-end Engineer | *Trigan* Feb 2022 – Jun 2022

- Developed the Next.js-based main website for Trigan.org, focusing on responsiveness and SEO optimization.

Software Engineer Intern | *ZorgIT Group* Dec 2021 – Feb 2022

- Developed a modern portfolio website for Arcon Interior to boost brand reach and client engagement.

EDUCATION

Premier University, Chattogram | *B.Sc. in Computer Science & Engineering* Fall 2016 – Jun 2021

- GPA: 3.21 | Final project: P2P lending platform built with Laravel and Next.js.

Premier University, Chattogram | *MBA in Finance* Mar 2022 – May 2024

- GPA: 3.74

OPEN SOURCE

- **Flutter Framework** (flutter/flutter): Four merged PRs, including flutter run printing the exact -d flag after device selection (closing an issue open since 2020), an AbsorbPointer vs IgnorePointer API sample (closing a 2021 issue), and template fixes shipped in Flutter 3.47. PR #188941 · PR #188940 · PR #187443 · PR #188382
- **Flutter DevTools** (flutter/devtools): Fixed a RenderFlex overflow in the debugging controls at narrow widths, closing an issue open since 2022, with six regression tests. PR #9949
- **Flutter Packages** (flutter/packages): Seven merged PRs to material_ui, cupertino_ui, Pigeon, and path_provider, including a CupertinoPicker dispose crash, NavigationIndicator repainting, and a clear enhanced-enum parser error. PR #13473 · PR #13012 · PR #13011 · PR #13010 · PR #11880 · PR #11894 · PR #11793
- **Dart Test Framework** (dart-lang/test): Fixed a compact reporter crash on narrow terminals. PR #2799
- **React Native Docs** (react/react-native-website): Removed an outdated TextInput multiline border caveat, corrected across all localized copies of the page. PR #5200
- **Supabase Flutter SDK** (supabase/supabase-flutter): Fixed a realtime channel-rejoin crash from an expired cached JWT after long backgrounding; shipped in realtime_client 2.7.4. PR #1365
- **Sentry Dart/Flutter SDK** (getsentry/sentry-dart, 1M+ downloads): Two production fixes shipped in v9.21.0, for silent error-swallowing in runZonedGuarded and broken Web diagnostic logging. PR #3697 · PR #3698

PROJECTS

- **Snake Classic** (Flutter): Modern arcade Snake with 8 game modes, online 1v1, 147 achievements, and 9 languages. **10,000+ downloads**, 5,300+ active installs. GitHub · Play Store · App Store
- **FreeWay** (.NET 10 + Next.js): My AI gateway across 8 AI providers, powering 4 of my AI apps and cutting per-call token overhead by 65%: benchmark-ranked free-tier routing, daily adoption of new free models, and premium requests served from a Claude Code subscription under an hourly budget. GitHub
- **AI Persona** (Flutter + ASP.NET Core): Chat with AI characters you design, with LLM moderation, on-device voice, and a persona marketplace. Play Store
- **Atlas** (Flutter + ASP.NET Core + AI): Self-care app where Aurora, an AI companion, writes weekly reflections and turns plain sentences into habits. GitHub · Play Store · App Store
- **Quotely** (Flutter + ASP.NET Core + PostgreSQL): Quotes and a daily facts game fed by an AI content pipeline that generates, validates, and deduplicates every item. 500+ downloads. GitHub · Play Store · App Store
- **Pourfect** (Flutter + ASP.NET Core): Ball-sort puzzle with 150 solver-verified levels. GitHub · Play Store · App Store
- **PinPoint** (Flutter + ASP.NET Core): Notes app with on-device encryption, a zero-knowledge mode, and 9 languages. 1,000+ downloads. GitHub · Play Store · App Store
- **The Accountant** (Flutter + ASP.NET Core): Finance app with an AI agent using 28 tools, AI receipt parsing, and 160+ currencies. GitHub · Play Store · App Store
- **Odyssey** (Flutter + ASP.NET Core): Offline-first travel journal with geotagged memories, multi-currency budgets, trip templates, and collaborative sharing. GitHub · Play Store · App Store
- **Screw Out** (Flutter + ASP.NET Core): Blueprint-style screw puzzle with 100 solver-checked levels and a daily fewest-moves leaderboard. GitHub · Play Store
- **Sunstone Dusk Run** (Godot 4 + ASP.NET Core): One-thumb 3D runner through the Maya underworld with 6 Houses of Xibalba, daily runs, and global ranks. GitHub · Play Store

SKILLS

Languages: Dart, TypeScript, JavaScript, C#, Go, Rust, Python, SQL, C++ (Arduino)
Frameworks: Flutter, React Native, ASP.NET Core (.NET 10), Angular, Next.js, Svelte, NestJS, FastAPI, Godot
Data & DevOps: SQL Server, PostgreSQL, MongoDB, Redis, Firebase, Docker, GitLab CI/CD, OpenTelemetry, AWS
AI & Hardware: OpenAI, Gemini, Claude, MCP, Gemma 4, Qwen3, SAM 2, DistilBERT, NFC, RFID, ESP8266

HIGHLIGHTS

- Available for remote work globally: UTC+6, flexible on overlap hours, with remote team experience.
- AI builder: 6 AI systems at KDS Group plus 4 AI-powered public apps running on my own AI gateway.
- Shipped: 27+ apps and systems (16+ at KDS, 11 on Google Play, 7 on the App Store), 11,000+ downloads.
- Open-source contributor: 17 merged PRs in 7 major projects; author of Tiny_State on pub.dev.
- Technical writer: 127,000+ views and 5,700+ followers across 65 posts on Dev.to; top post has 500+ reactions.
